College/University Entrance Requirements (CADRs):

- College/University-bound students are strongly recommended to take English 12 or higher.
- Most four-year colleges require a minimum of three full years of college-prep math through Algebra II or higher.
- Washington State four-year public universities require that students take math and/or math-based science in their 12th grade year.
- Most four-year colleges require at least two years of the same world language.
- Most four-year colleges require at least 2 years* of lab science. Washington State public four-year universities require that one year be Algebra-based Biology. *To align with high school graduation requirements, a third credit of science will be required for students entering college summer or fall 2021. The third credit would not need to be lab-based.
- It is the student's/parent's responsibility to contact the individual colleges for specific freshmen entrance requirements whether public, private, or out-of-state colleges or universities.
