

## Digital Camera/Technology Usage

Each student is expected to purchase an SD card with at least 8GB of memory. It will be used for outside of classroom photography. It should be clearly labeled with the student owner's name.

Students are expected to be responsible for school-owned equipment used Digital Photography class: including digital cameras, lenses, lens caps, film cards, batteries, and camera bags. Digital cameras are valued at \$1,500; lenses are valued at \$300 to \$500. Camera repairs start at \$400 minimum; these are not minor costs.

Computer equipment must be cared for in a business-like manner and misuse will not be tolerated. Students will not allow friends or other students to handle these cameras at any time.

***I understand that I/my student will be required to pay for lost or damaged equipment if equipment is lost, broken, or damaged while checked out to him/her.***
